

Junior Business & Technology Consultant (0-3 years work experience)

You make the difference for our clients by combining deep process & system knowledge with a drive for operational excellence, and form part of the foundation team in the UK.

Are you a sharp and daring individual with an entrepreneurial spirit? Are you able to combine deep process and system knowledge with an operational focus? Then we're looking for you! We are looking for a driven, down-to-earth, results-oriented team player that wants to help build the UK business working for clients such as Vodafone, Philips, Heineken, and many leading utilities.

Founded in the Netherlands over a decade ago, the company has now started up in the UK. Their integrated approach focuses on delivering measurable results, working closely together with client teams on their biggest challenges. They work closely with many Process and Technology partners, such as: Mendix, Yellowfin, Fluxicon, Ulpath and Informatica. The UK organisation has a clear focus across a distinct set of propositions: Operational Effectiveness, Process Digitisation, Robotic Process Automation, Agile Delivery and Business Change.

A key part of their success is in combining Business and Technology Consulting. Not only does this cross-skilled working make the work more rewarding for its consultants, it ensures that the design, development and implementation occurs faster and more effectively for our clients.

As a Junior Business & Technology Consultant, you will contribute to the development of the expanding UK practice. You will benefit from a commitment to tailored personal development, a genuine and aggressive meritocracy, and an attractive rewards package, including bonuses at all grades. Are you a talented and communicative university graduate with proven analytical and technological skills, looking to be at the heart of something, looking to be more than just 'another employee'? Don't hold back and apply!

Responsibilities
