

Job Opening

Senior Business & Technology Consultant (8+ years work experience)

You make the difference for our clients by combining deep process & system knowledge with a drive for operational excellence, and form part of the foundation team in the UK.

As a Senior Business & Technology Consultant, you contribute to the development and delivery of First Consulting's vision and mission. You have an active role in the acquisition of new projects and are therefore capable of helping us grow our Business. You take responsibility and ownership for the quality of our client delivery, help structure and lead projects, and safeguard the scope of individual projects and their alignment. By doing so, you contribute to leading customers such as Heineken, Vodafone, BAM, Delta Lloyd and leading Utilities by improving their operational performance.

Founded in The Netherlands over a decade ago, First Consulting has now started up in the UK. Their integrated approach focuses on delivering measurable results, working closely with client teams on their largest challenges. They work closely with many Process and Technology partners, such as: Mendix, Yellowfin, Fluxicon, Ulpath and Informatica. The UK organisation has a clear focus across a distinct set of propositions: Operational Effectiveness, Process Digitisation, Robotic Process Automation, Agile Delivery and Business Change.

You will contribute to the development of the expanding UK practice. You will benefit from a commitment to tailored personal development, a genuine and aggressive meritocracy, and an attractive rewards package, including bonus. Are you looking to be at the heart of something new, looking to be more than just 'another employee'? Don't hold back and apply!

Responsibilities

- Provide operational leadership to one or more project teams;
- Deliver projects from the initiation phase until the handover to the client organisation within the agreed schedule and budget, in accordance with the agreed quality standards;
- Manage escalations and optimise effective communication with the client;
- Build and maintain a relevant network at the client;
- Identify possibilities to expand the current service package at both new and at existing clients;
- Direct and manage the business and technology consultants on the project as well as their personal development.

Requirements

- A university degree in areas such as: Science, Technology, Engineering, Mathematics, Business;
- A minimum of 5 years' experience as a consultant in a project-based, client-orientated environment;
- A minimum of 3 years' experience in a role with ultimate responsibility in a project environment;
- Down-to-earth, no-nonsense mentality;
- Strong communication skills;
- Explicitly decisive and result-orientated;
- Analytical & creative;
- Commercial: demonstrable experience in developing client relationships;
- Socially skilled team player;
- Experience in an asset-intensive sector (energy, telecom, transport) is an advantage.

What we offer

- A young and ambitious environment where personal development is key.
- Direct freedom and responsibility in your work.
- Structured coaching from your own mentor.
- A thriving community, active in both business and social matters, e.g. annual ski trip.
- A market leading package (excellent salary, benefits fund, bonus, 25 days holiday, laptop and mobile phone).
